Summary

I have hands-on experience in the technology industry, particularly in areas like web development, data analytics, and database management. I have worked on projects involving the Django framework, creating an Employee Leave Management system, and gained expertise in data cleaning, exploratory data analysis, and data visualization tools like Power BI and Tableau. In addition, I have worked on a Redbus data scraping project using Selenium and Streamlit for dynamic data filtering and visualization. These experiences have helped me develop strong skills in Python, SQL, data management, and web scraping. I am passionate about solving real-world problems through technology and continuously learning new skills to stay ahead in the tech industry.
